Visionary Intelligence

TO WHOMSOEVER IT MAY CONCERN

This is to certify that **Mr. Siddhant Ray** has completed his internship with **Prisma Global Limited** from 3rd June 2024 to 13th June 2024.

I am writing to commend Siddhant Ray, a 16-year-old intern who joined us at Prisma AI for a 14-day internship. During this brief period, Siddhant demonstrated exceptional skills, professional work ethics, and a remarkable level of dedication and focus.

Throughout his internship, Siddhant was involved in research for both Blur Detection and Anti-Spoofing. His diligence and attention to detail were evident in the quality and functionality of his contributions.
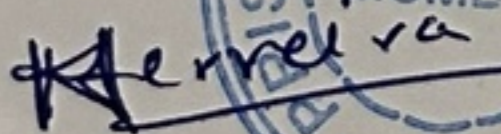

Blur Detection: Siddhant was engaged in the research and development of a blur detection system that efficiently identifies blurred images using advanced image processing techniques such as Laplacian Variance, which are typically taught at the university level.

Anti-Spoofing: In addition to the blur detector, Siddhant worked on the research and development of an anti-spoofing designed to distinguish between real and spoofed image representations of faces. This tool leverages texture and depth analysis to prevent fraudulent activities.

Despite the intense workload for a fresher intern at the young age of 16, Siddhant maintained a humble and well-behaved demeanor, earning the respect and admiration of his peers and supervisors. He exhibited punctuality and professional work ethics, and remained focused on his tasks, ensuring that each task was completed to the highest standard.

Siddhant's ability to grasp complex concepts and apply them effectively was impressive. We are confident that Siddhant has a bright future ahead of him and believe that he will continue to excel in his academic and professional pursuits.

For Prisma Global Limited
